Name of the company	Francesca Romiti
Sector of activity	Climate Finance
Country of operation	Italy
Stage of business	Altro: Consultant for several companies
Describe your project proposal	We want to develop different sustainable agriculture projects leveraging GCF funding .the projects aim to introduce transformational changes in the agriculture sector scaling-up proven technologies and new agricultural practices The technologies and agriculture practices can be provided by partnership and collaboration with italian companies leaders in the field of sustainable agriculture, food conservation and food processing. The projects can Integrate ecological, agronomical and socio-economic knowledge to design and assess efficient productive systems based on agroecological concepts and to address the difficulties of transition of technical practices
Revenue in 2019	Up to 1 Mln US Dollars
Number of employees	1-10
Looking for...	Partnership Collaboration
If you are looking for investment, how much it should amount?	

In collaboration with

<p>Please explain the environmental/social impact of the project (emissions reduction, job creation, gender equality...)</p>	<p>The different projects we propose could introduce in the country both new agriculture techniques than know how transfer than new business model and strategy. The results we can obtain will therefore have a rapid and practical impact on the local farmers involved in the project and will contribute to empower rural communities in terms of Improvement of crop production, Low-Carbon Development and Strengthening of farming systems .</p> <p>Following possible impact:</p> <p>Reduce climate risk in different area of the country, supporting innovative agriculture adaptation action. Promote cost effective methodologies in agro-management systems that will enhance food security and resilience and it will create conditions for new investment. In particular:</p> <ul style="list-style-type: none"> -The short supply chains typically involve local producers working together to eliminate process bottlenecks and to promote local food markets .To realize it is we can introduce innovative approaches such as : training of trainers and support of farmers groups, tutoring activity about optimization of production process, increased market orientation through business support units, creation of professional figures and /or agribusiness centre to support the network of businesses by delivering supplies and services to farmers within the network. - Improvement of value chain with a cluster approach . The cluster approach provides opportunities for economies of scale in the delivery of support services and utilization of common marketing infrastructure, input/output bulking, and enhanced value addition (grading and processing of produce) all along value chains. <p>Create Knowledge and information support mechanisms.</p>
