

RWANDA AND ITALY B2B EXCHANGES TO ENHANCE GREEN GROWTH IN BOTH COUNTRIES

THURSDAY, 15 OCTOBER 2020

10:00-12:00

Name of the company	MAGIA HOLDING
Sector of activity	Construction
Country of operation	Rwanda
Stage of business	Start-up (1-3 yrs)
Describe your project proposal	CONSTRUCTION OF 2600 MIX HOUSES
Revenue in 2019	Up to 1 Mln US Dollars
Number of employees	1-10
Looking for...	Partnership Investor New Clients
If you are looking for investment, how much it should amount?	100-500 K US Dollars
Please explain the environmental/social impact of the project (emissions reduction, job creation, gender equality...)	<p>Our project proposal stems from the desire to promote a new concept of urban, residential, social, commercial and industrial "ecologically futuristic" core that is as self-sufficient as possible in terms of energy, water and environment.</p> <p>We started from the assumption that realizing urban nuclei with a residential value only, with the offer of minimal and essential services, would have hardly solved the problems currently faced (above all) by the poor</p>

In collaboration with

and middle classes of the Rwandan population. Starting from this assumption it was possible to deduce that among the minimum requirements necessary for a dignified quality of life it is necessary to provide for the right to live in private spaces (homes) and public spaces that are as healthy and at the same time socially and civically stimulating, with an occupation work that produces a fair income, as well as access to services commonly considered essential such as water and electricity.

In order to achieve these ambitious objectives, the design aspects were analyzed both on a general scale and on a more detailed scale, paying particular attention to construction and architecture, basing the design choices on the most important aspects of an ecological settlement: energy, bio-architecture, water conversion, landscape planning, waste management etc., demonstrating the real possibility of generating a community that is socially, economically and ecologically as self-sufficient as possible.

Our Vision is therefore to create an eco-sustainable multi-social neighborhood, where people can live in houses of different types, having the same services available. These services improve the quality of life and physical and mental health of citizens, allowing them to participate actively in the well-being of the Community. Our Mission is to guarantee the best housing solution at the lowest price, with MADE IN RWANDA constructions, thanks to the introduction in the country of new innovative construction technologies, easy to build and put into operation, and competitive costs compared to the current technologies present in Rwanda, but with the best aesthetic, structural and durability qualities.

Magia Holding Ltd. was established in 2018 with the aim of managing the planni
