Please explain the environmental/social impact of the project (emissions reduction, job creation, gender equality...)	To date, Wastezon has registered in its mobile application 150 e-scrapers, 1 recycling Industry, 165 households and businesses, collected over 416 tons of electronic waste (e-waste) which is equivalent to 2826.42 metric tons of avoided CO2 emissions. Headquartered in Rwanda, Wastezon is becoming a leading platform that connects recycling actors with waste producers. Meanwhile,

In collaboration with

	it's business model involved electronics waste, in 2020 Wastezon started to incorporate both plastics and organic wastes business models by launching "Wastezon Smart Bin" which will automatically sort organic from inorganic waste and track organic decomposition to fertilizer. By championing to achieve both SDG 12 and 13 our target is to prevent at least 1000 tons of waste from diverting from going to landfills.
